Target version:		Spent time:	1.00 hour
Description			

History

#1 - 09/11/2019 10:39 PM - Dyllan Sowers

- Assignee changed from Dyllan Sowers to Ethan Curley

- Start Bee Flogger
- Create an unnamed document simply containing the letter "a"
- Click on the FTP button on the toolbar
- Try to ftp to your server

BUG: Observe; the ftp server is no longer responding. Indeed ps -auxg shows that it is not even running and there is a core dump in /.

EXPECTED: No crash

#2 - 09/11/2019 10:42 PM - Ethan Curley

- Status changed from In Progress to Resolved

Not our code, Jill, that's just proftpd which comes with Linux.

#3 - 09/11/2019 10:43 PM - Dyllan Sowers

- Status changed from Resolved to In Progress

That doesn't sound right. I've never been able to crash proftpd when I connect with a normal ftp client. Our code crashes it every single time. Ftp servers don't just "crash".

#4 - 09/11/2019 10:44 PM - Ethan Curley

- Assignee changed from Ethan Curley to Omar Chowdhury

Mikey, can you look at this? Maybe your client code is doing something wrong.

#5 - 09/11/2019 10:46 PM - Omar Chowdhury

- Status changed from In Progress to Resolved

I think I was passing the user name instead of the password or something...

#6 - 09/11/2019 10:46 PM - Dyllan Sowers

Still happens in Build 2021.

#7 - 09/11/2019 10:48 PM - Omar Chowdhury

- Status changed from Resolved to In Progress

Whoa. That's strange. Lemme debug this.

#8 - 09/11/2019 10:49 PM - Omar Chowdhury

I'm thinking it might be MikeyStrCpy()...

#9 - 09/11/2019 10:49 PM - Omar Chowdhury

- Status changed from In Progress to Resolved

Ahhh!
FIXED!

#10 - 09/11/2019 10:50 PM - Dyllan Sowers

- Status changed from Resolved to Closed

Appears fixed in build 2022, so I'll go ahead and close this.
